Sales & Profit by State

Sales & Profit by Segment

Key Insights

Overall dataset findings

01 Sales remained stable
Annual sales stayed near ₹50 Cr from 2019–2023, with very little overall growth.

02 Categories are evenly distributed
No category dominates revenue; sales are very similar across all six categories.

03 No major state concentration
State sales are highly balanced, with each state contributing roughly 10% of total revenue.

04 Discounts pressure margins
Profit margin falls from 19.05% to 11.09% between the lowest and highest discount bands, while transaction value stays nearly unchanged.

Seasonal Fruits & Vegetables	18.89%	16.81%	14.83%	12.97%	10.85%

Key Insights

Overall dataset findings

1. Higher discounts, lower profit

The 40–50% discount band generates the highest sales (₹53.42 Cr), but the lowest total profit (₹5.92 Cr).

2. Profit margin declines

Profit margin falls from 19.05% at 0–10% discount to 11.09% at 40–50% discount — a difference of 7.96 percentage points.

3. Consistent across categories

The downward margin pattern appears across all six product categories. This is an association in the dataset, not proof that discounts alone caused lower margins.
